Zone of Adaptation - ASZ: ALL SEASON ZONE, LSZ: LONG-SEASON ZONE, MSZ: MID-SEASON ZONE, SSZ: SHORT-SEASON ZONE

▮ Brevant maturity check in B3010M

▮ DEKALB maturity rating is based on Bayer's Market Development Trials

▮ Straight Cut Plus - DEKALB canola hybrids that are a result of breeding selection to improve pod shatter genetics and also carry our additional trait with improved pod integrity for enhanced pod shatter protection.

▮ Unless otherwise noted, maturity ratings based on relative to WCC/RRC check performance in available Co-op 1 & 2, CPT and private trials. Your results may vary according to agronomic, environmental and pest variables.

Zone of Adaptation - ASZ: ALL SEASON ZONE, LSZ: LONG-SEASON ZONE, MSZ: MID-SEASON ZONE, SSZ: SHORT-SEASON ZONE

Brevant maturity check is B3010M

DEKALB maturity rating is based on Bayer's Market Development Trials

InVigor maturity, height and standability are based on performance ratings and data compiled from several internal trials over multiple years.

All clubroot-resistant InVigor hybrids have been developed to be resistant to the most predominant pathotypes found in Canada at the time of their registration. InVigor L330PC, InVigor L333PC, InVigor L350PC, InVigor L355PC, InVigor L356PC, InVigor L345PC, InVigor L340PC and InVigor Choice LR354PC all share the same 1st generation clubroot resistance profile. InVigor L341PC and InVigor L343PC have this resistance profile, plus they contain 2nd generation multi genetic clubroot resistance to additional clubroot pathotypes to help combat evolving clubroot pathotypes.
